Executive Summary

Final-year Computer Science and Engineering student with a strong foundation in Java, C++, Data Structures and Algorithms, and full-stack web development. Passionate about building efficient software solutions and applying technical knowledge to solve real-world problems through hands-on projects. A quick learner with strong analytical, problem-solving, and teamwork skills, seeking an opportunity to learn, contribute, and grow in a dynamic organization.

Education

B.E. Computer Science and Engineering

Rajalakshmi Engineering College, Chennai

Graduation Expected May 2027

CGPA: 7.25/10

Skills

Programming Languages: C++, Java

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, FastAPI

Databases: MySQL

AI & Computer Vision: TensorFlow, OpenCV, ONNX

AI & Computer Vision: Git, GitHub, Postman

Experience

Frontend Web Development Intern

June 2025

HYUNDAI MOTOR INDIA LIMITED — On-site, Chennai, India

HTML, CSS, JavaScript

- Developed 2 internal web applications—a Room Management System and Intern Mail Management Application—replacing manual room tracking and simplifying room allocation and communication workflows.
- Collaborated with the IT Autoever cross-functional team to analyze, design, and implement automation features and web modules across 2 internal applications, streamlining communication and operational workflows.
- Received a Team Performance Award for outstanding contribution during the development of 2 internal applications, demonstrating strong learning agility and adaptability.

Projects

Smart Interview Scheduling System | *React.js, Node.js, Express.js, MongoDB, REST APIs* | [Link](#)

Jan 2026 – Mar 2026

- Engineered a full-stack Recruitment Management Platform to streamline candidate management, interview scheduling, and recruiter feedback workflows.
- Implemented RESTful APIs, role-based access control, and MongoDB integration for secure and efficient data management.
- Automated interview assignments, candidate status tracking, and interviewer feedback workflows to improve recruitment process efficiency.

SmellSenseAI - AI-Powered Food Freshness Detection System | *Python, TensorFlow, OpenCV,*

***React.js, FastAPI* | [Link](#)**

Oct 2025 – Nov 2025

- Built an end-to-end AI-powered food freshness detection system using computer vision to classify food as Fresh or Spoiled.
- Built and deployed a full-stack application using Python, FastAPI, and React.js to provide real-time freshness predictions through REST APIs.
- Integrated a CNN-based classification model with OpenCV preprocessing and ONNX Runtime for efficient model inference.

Certifications & Learning

Java for Absolute Beginners (Udemy, 2024) | [Link](#) Spring Boot

(Udemy, 2026) | [Link](#)

SQL Essentials

(LinkedIn, 2025) | [Link](#) Linux: Bash Shell & Scripts (LinkedIn, 2025) | [Link](#)
